

## PROLIFE FACTS

ProlifeNZ is the youth based pro-life group that brought US speakers Jill Stanek and Bryan Kemper to NZ earlier this year for a very successful speaking tour. They have recently launched a page on their website entitled **Just Think** to encourage young people to think about and respond to the issue of abortion.

From the **Just Think** webpage: "All too often, our societies have left important issues unaddressed, because they were too controversial. Such issues include apartheid, genocide and slavery. It's not because most people thought slavery was a good thing. It's because most people just didn't think about it. A topic today that most people don't think about is abortion. Abortion is controversial as, depending on your position, it either promotes a woman's fundamental right to her body or breaches an unborn child's fundamental right to life.

However, the relationship of abortion with fundamental rights is the very reason that we should be thinking about it."
